\*\*For Baird's beaked whale, carryover is permitted. Where quota is given as x+y (e.g. 66+10) the second number is the carryover from the previous season.  
 †The great east Japan earthquake and tsunami (11 Mar. 2011) affected the Dall's porpoise fishery area causing a drop in catch to well below pre-earthquake levels.  
 ‡Small type quota was 33 of which 2 were caught. The remaining 31 were transferred to the drive/hand harpoon fishery quota giving a drive/hand harpoon quota of 135+31=166. Thus, the total quota was 168 (=2+31+135).  
 ††The Pacific white-sided dolphin quota was established in the 2007/08 season (see Progress Report on small cetacean research, JFA, 2008/09).
