

## Annex K

### Intersessional E-mail Groups

This list contains the intersessional groups identified at SC68B. It has been divided into the following group types:

- (1) **Steering Groups (SG):** these are groups that have been set up to ensure that particular meetings, workshops or identified pieces of work are completed by SC/68B. They have the authority to make decisions on behalf of the Committee within the context of their terms of reference (e.g. meeting budget spends, participants, agreements on parameters for analyses). Numbers are limited and members agreed at the meeting although the Convenor may request additional members or respond to late requests to be members. The expected outcomes will be either a workshop/meeting report or an analytical paper.
- (2) **Intersessional Correspondence Groups (ICG):** these are groups that have been set up to ensure progress on particular topics within the intersessional period. Membership is more flexible and open. It is expected that a written report on progress will be submitted to the Committee at SC68B.
- (3) **Advisory Groups (AG):** these are occasional groups established by the Committee to provide scientific and technical issues on specific issues if requested by a Contracting Government.
