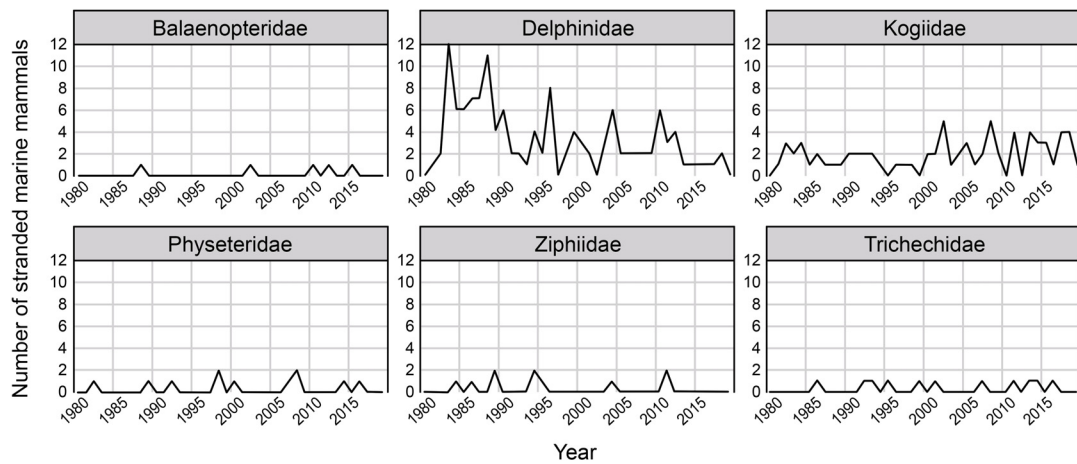

Fig. SI1. Annual distribution of each marine mammal taxonomic family stranded in Texas from 1980 through 2019, excluding common bottlenose dolphins (*Tursiops truncatus*).

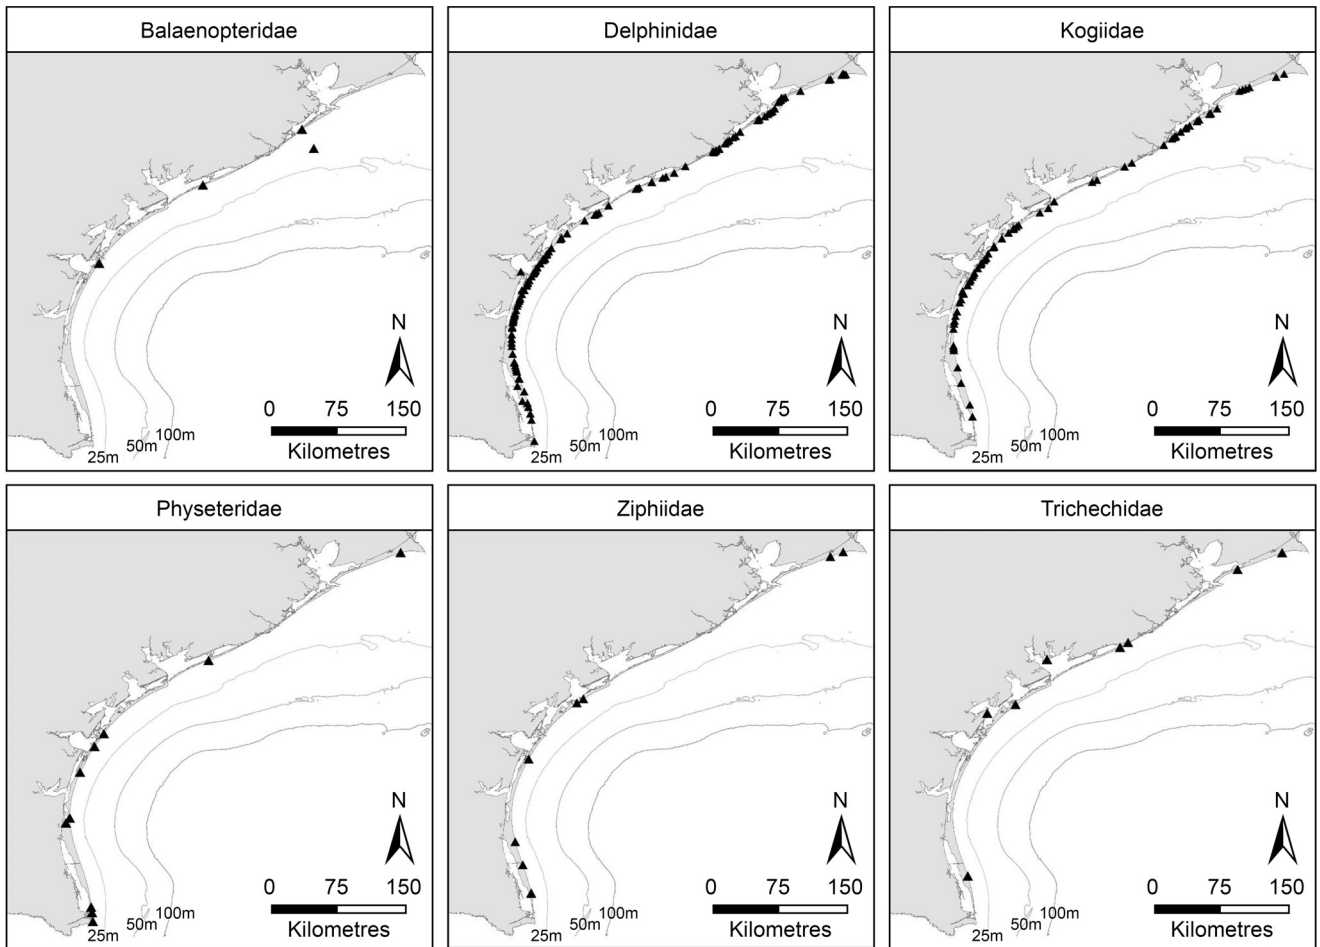

Fig. S12. Plots of marine mammal stranding events in Texas, grouped by taxonomic family (excluding common bottlenose dolphins, *Tursiops truncatus*), from 1980 through 2019. Black triangles represent a single stranding, gray lines represent the 25m, 50m and 100m isobaths.
